Parents/Guardians

We appreciate the support and cooperation we have received from Oley Valley School District students, staff, parents and guardians. We continue to recommend and reinforce good hygiene practices. Our school nurses are working with parents/guardians and physicians as students become ill. In addition we are monitoring student attendance in each school building.

To date we have 2 confirmed student cases of the H1N1 virus. Both of these students are recuperating at home and have not returned to school.

Please continue to check the website for any further updates.
